

HARM REDUCTION SERIES

ALBERTA'S VIRTUAL OPIOID DEPENDENCY PROGRAM: WHY IT WAS CREATED AND HOW IT WORKS

JUNE 11, 2019
13:30 – 15:30

This videoconference session will provide an overview of the Alberta Health Services (AHS) Virtual Opioid Dependency Program (VODP). VODP is a telehealth-based program that support rapid access to care and transition supports for clients who need opioid addiction treatment.

LEARNING OUTCOMES

- Service delivery and how to access the VODP program
- Learn more about the referral process and how to access from your community

PRESENTED BY: Dr. Nathaniel Day.

Dr. Day is the Medical Lead for the Rural Opioid Dependency Program with Alberta Health Services.

All previous sessions in the Harm Reduction Series are available to view on the First Nations Telehealth Network (www.fntn.ca) You can access the videos on the Library or within the Harm Reduction Series page.

Session 7 in the Harm
Reduction Series

Target Audience: This session is open for anyone interested in learning more about VODP and how to access the program

Audio lines and live stream will be available for those who cannot attend via videoconferencing. To register for one of these services please contact the First Nations Telehealth Network.

This session will be recorded for future viewing on the First Nations Telehealth Network Portal
